

Changing the face of irrigation and fire-resistant material

Forsee, LLC: Innovating Fire-Resistant Solutions Forsee, LLC, based in Prattville, transforms natural fibers into cutting-edge fire-resistant materials. Founded by Cosmetologist **Chera Howard**, who is completing her Master's in Environmental Science, the company has developed proprietary technology converting fibers into granular and liquid forms for high-performance building materials. These advanced materials withstand heat up to **2000°F**, significantly slowing fire spread, enhancing safety, and aiding firefighting efforts. With multiple patents secured, Forsee, LLC has raised over **\$ 495,000** from sources including the **National Science Foundation**, **Auburn University's Tiger Cage Competition** and **Biomanufacturing of Alabama (Arrowpoint Labs)**. The company is now seeking funding to scale its groundbreaking, sustainable innovations.
